DATA COMPLETENESS -- 97% — every dimension, weight, tank, appliance and garage figure on this page is the Grand Design factory value for its own MY2027 floorplan page; payload is the published GVWR minus the published UVW, the same arithmetic the trade catalogs use; the standard solar figure is shown as a PREP rather than a panel because Grand Design's own MAV page calls it a 200-watt solar prep in its prose and a 200-watt solar panel in its package

heading - a prep is wiring and a panel is a panel, so the conservative reading is used
